

**Innovative RFID-Enabled  
Inventory Management  
Solution for  
Medication Trays**

# CubixxMT increases pharmacy productivity while enhancing delivery of care

---

CubixxMT fits seamlessly into any health system  
pharmacy workflow. Our solution requires  
minimal footprint and products ordered from  
AmerisourceBergen arrive pre-tagged.

## Health System Pharmacies Work Smarter— and Safer

A touchscreen kiosk and handheld scanner ensure cost-efficient and cost-effective transparency of all pharmaceuticals dispensed from and returned to the pharmacy. Captured data immediately appears on the centralized dashboard in real-time, increasing security and compliance while reducing human error. A separate handheld scanner offers mobilized inventory management throughout a facility and with all types of medication storage cabinets (i.e., Pyxis MedStation™).

### Key Advantages

✓	Pre-tagged products from AmerisourceBergen saves time and money
✓	Fits in confined spaces with minimal footprint
✓	Works seamlessly in any health system pharmacy
✓	Mobilized system works with all types of storage cabinets
✓	Expiration management prevents waste
✓	Billing system integration for revenue capture
✓	Accurate calculation of cost of goods (COGs)
✓	Auto-replenishment of products increases efficiency

## About Us

Applying everything from RFID innovation to remote monitoring tools to customized user interfaces that capture real-time patient data, we're transforming the way healthcare providers, pharmaceutical manufacturers, payers and patients approach medication storage and dispensing.
